# File generated by HDevelop for text file Version 19.11.0.0
# Non-ASCII strings in this file are encoded in local-8-bit encoding (cp936).
#
# Please note that non-ASCII characters in string constants are exported
# as octal codes in order to guarantee that the strings are correctly
# created on all systems, independent on any compiler settings.
#
# Source files with different encoding should not be mixed in one project.
#####
#####
# Main procedure
```

```
* Image Acquisition 01: Code generated by Image Acquisition 01
open_framegrabber ('File', 1, 1, 0, 0, 0, 0, 'default', -1, 'default', -1, 'false',
'printer_chip/printer_chip_01', 'default', 1, -1, AcqHandle)
while (true)
    grab_image (Image, AcqHandle)
    * Image Acquisition 01: Do something
endwhile
close_framegrabber (AcqHandle)
```
